ABOUT MYSELF

Computer Science undergraduate (6th Semester, IIIT Manipur) working at the intersection of **research** and **production engineering**. Currently an exchange student and Research Intern at **IIT Madras**, building a biodiversity data pipeline under Prof. **KC Sivaramakrishnan** (FP Launchpad), and a **Full-Stack Developer** at O3Origin, an AI-powered ed-tech platform. Experienced in taking systems from design to production, with client work including a live ATS deployed for a hiring company. Passionate about **Backend Engineering**, **Distributed Systems**, and **Data-Driven Research**, and looking to deepen this trajectory at IIT Madras.

EDUCATION

Indian Institute of Information Technology (IIIT), Manipur *2023 – 2027*
Bachelor of Technology in Computer Science & Engineering (6th Semester) **CPI: 8.52/10.0**

Indian Institute of Technology (IIT), Madras *4th Year – Present*
Exchange Student, Research Internship (FP Launchpad)

Jawahar Navodaya Vidyalaya (JNV), Yadgir *Class XII*
Higher Secondary Education

EXPERIENCE

FP Launchpad, IIT Madras *2026 – Present*
Research Intern (Exchange Student) – CoreStack Project, under Prof. KC Sivaramakrishnan Certificate

- Selected as an exchange student to work with the **FP Launchpad** systems research group at IIT Madras on the **CoreStack** project, focused on scalable systems and infrastructure engineering.
- Collaborating with faculty and researchers on system design and implementation, applying rigorous engineering practices in a research setting.

O3 Origin *Feb 2026 – Present*
Full-Stack Developer (Remote)

- Building an AI-powered study companion for JEE/NEET aspirants end-to-end, powered by **Sarvam AI**, across both frontend and backend.
- **System Architecture:** Led the end-to-end design of the product's MVP using **Python/Django**, ensuring robust backend scalability.
- **Backend Engineering:** Established core engineering best practices and built the API infrastructure from scratch to support rapid feature iteration.
- **Frontend & UI/UX:** Built and refined user-facing interfaces to deliver a smooth, intuitive learning experience.

KEY PROJECTS

CoreStack – Biodiversity Data Pipeline | *Python, GBIF API, IUCN Red List* Team Page

- Building a data pipeline under Prof. KC Sivaramakrishnan at FP Launchpad, IIT Madras, that ingests occurrence records from **GBIF** and conservation status data from the **IUCN Red List**.
- Computing biodiversity metrics such as **species richness** and **endangered species counts** across regions from the combined dataset.
- Applying rigorous systems-engineering practices to build a reliable, reproducible data pipeline in a formal research setting.

O3Origin – AI EdTech Platform | *Python, Django, Sarvam AI* Website

- Built the backend and system architecture for an AI-native learning platform delivering personalized guidance and 24/7 AI mentoring to JEE/NEET aspirants.
- Integrated **Sarvam AI** to power adaptive, conversational tutoring at scale.

RecruitArt – Applicant Tracking System (ATS) | *Python, Django, PostgreSQL* Website

- Designed and built a complete **ATS** for RecruitArt, a healthcare recruitment and staffing company, now **live in production** and used daily by their hiring team.
- Delivered as a client project end-to-end – from requirements to deployment – to manage candidate pipelines, job postings, and recruiter workflows across the doctor-hiring process.

TECHNICAL SKILLS

Languages: Python (Advanced), C++, C, Java, SQL
Backend: Django, Django REST Framework, API Design, System Design
Cloud & DevOps: AWS (EC2, RDS), Docker, CI/CD (GitHub Actions), Nginx, Linux
Core Concepts: Data Structures & Algorithms, DBMS, OOP, OS Concurrency, Distributed Systems

RESEARCH SKILLS

Data Sources & APIs: GBIF Occurrence API, IUCN Red List API, data ingestion & normalization from heterogeneous sources
Analysis: Biodiversity metrics (species richness, endangered species counts), exploratory data analysis
Research Practice: Reproducible pipeline design, systems-engineering rigor applied to research problems, faculty-guided project work
Collaboration: Working within a formal academic research group (FP Launchpad, IIT Madras) alongside faculty and PhD/MS researchers
